

ENERGY EFFICIENCY. USE LESS ENERGY. SAVE MORE GREEN.

Set your **AC at 78°**

Use **programmable
thermostats.**

Install CFLs.
They use 75%
less energy.

Turn off lights
not in use.

Switch on the fans.
They use 80% less
energy than ACs.

Using energy more efficiently doesn't just mean you'll save energy. You'll also save money—and help protect our environment.

Follow these simple steps to reduce your energy use and save money this summer.

- Use fans more and air conditioners less to keep cool while reducing your electricity bills.
- Use a programmable thermostat and set your summer air conditioning temperature at 78 degrees.
- Switch to CFL bulbs, which last 10 times longer and use 75 percent less electricity than incandescent bulbs.
- Choose energy-efficient ENERGY STAR® products when buying new appliances.
- Take advantage of utility and state programs for improving your home's energy efficiency.
